PROFESSIONAL SUMMARY

A results-driven **Full Stack Web Developer** with **over 8 years of experience** specializing in **PHP, Laravel, Vue.js, React.js, TypeScript, MySQL, and WordPress**. Proven expertise in **backend and frontend development, API integrations, database optimization, and server management**. Adept at developing scalable web applications for government and private sectors, delivering high-performance websites, enterprise solutions, and eCommerce platforms. Experienced in **online payments and crypto tracking**, ensuring secure and efficient financial transactions. Passionate about building efficient, secure, and user-friendly digital solutions.

EDUCATION

Eastern Visayas State University   Tacloban City, Leyte, Philippines
Bachelor of Science – BS, Information Technology   June 2007 – March 2017
Gained a strong foundation in software development, database management, and web technologies. Specialized in Laravel, Vue.js, MySQL, and JavaScript, building dynamic and scalable web applications. Developed a solid understanding of system analysis, cybersecurity, and server management, which helped in creating efficient and secure solutions.

Skills: JavaScript · HTML5 · CSS · PHP · VB.NET · Laravel

SKILLS

Frontend Development:
- Vue.js
- React.js
- JavaScript (ES6+)
- TypeScript
- Bootstrap 4 & 5
- Materialize
- Bulma
- HTML5, CSS, SASS
- Tailwind CSS

Backend Development:
- Laravel (PHP Framework)
- PHP (Core & OOP)
- Node.js
- Python

Database Management:
- MySQL, PostgreSQL (Schema Design, Optimization, Indexing)
- SQL Queries & Database Performance Tuning
- NoSql, Firebase, Supabase, SnowFlake

Content Management Systems (CMS)
- WordPress (Theme & Plugin Development)
- WooCommerce Customization
- Advanced Custom Fields (ACF)

DevOps & Server Management:
- AWS (EC2, RDS, S3, LightSail, Code Commit)
- Apache & Nginx Server Configuration
- Linux Server Administration

Tools & Version Control:
- Git & GitHub
- Postman (API Testing)
- cPanel & WHM

Third-Party Integrations:
- Salesforce Integration
- Klaviyo API
- Contact Form 7 & Eventin
- Segment.com (CDP)

Other Skills & Tools:
- UI/UX Design Principles
- SEO Optimization & Web Performance Tuning
- JIRA (Agile Development, Sprint Planning)
- Basecamp (Team Collaboration)

WORK EXPERIENCE

Rocket Station (Superstar Virtual Assistance Inc.)
Web Developer (Full Time)
June 2025 – Present

Key Responsibilities:
• Developed and maintained full-stack web applications using **Laravel**, **Vue.js**, and **React.js**.
• Worked closely with product and operations teams to translate business requirements into scalable technical solutions.
• Improved frontend performance through state management optimization, lazy loading, and efficient data fetching.
• Deployed and maintained applications in cloud environments, ensuring reliability and scalability.

Key Achievements:
☑ Full-Stack Feature Development – Delivered end-to-end features using Laravel APIs with Vue and React frontends.
☑ Database Optimization – Improved PostgreSQL query performance through indexing and schema refinements.
☑ Scalable Frontend Architecture – Built reusable component libraries to accelerate development and ensure consistency.
☑ Enhanced User Experience – Implemented real-time updates and interactive UI flows for data-driven applications.
☑ Production-Ready Deployments – Supported stable releases with proper environment configuration and monitoring.

Skills:
Laravel · Vue.js · React.js · JavaScript · TypeScript · PostgreSQL · REST APIs · State Management · Git · Cloud Deployment

ArchIntel Corporation   **Tysons Corner, VA**
Full Stack Developer (Full Time)   **April 2022 – February 2025**

Key Responsibilities:
- Developed and maintained full-stack applications using **Vue.js, TypeScript Laravel, and WordPress**.
- Built custom WordPress solutions, including **ACF fields, REST API integrations, and WooCommerce customizations**.
- Developed **dynamic and interactive UI components** with Vue.js and optimized frontend performance.
- Designed and optimized **MySQL databases**, ensuring efficient data retrieval and storage.
- Implemented **APIs and third-party integrations** (Salesforce, Klaviyo, Eventin, and custom RESTful APIs).
- Developed custom **Elementor widgets and WordPress shortcodes** for enhanced website functionality.
- Automated data syncs between **WordPress and Salesforce**, reducing manual input.
- Improved site **SEO and performance** by optimizing queries, caching, and implementing best practices.

- Deployed applications on **AWS (EC2, RDS)** and managed server configurations.

Key Achievements:

✅ **Optimized API Syncing** – Streamlined Salesforce-WordPress integration, reducing sync time by 40%.

✅ **Scalable Voting System** – Developed an interactive voting system for Wash100 nominees, improving engagement.

✅ **Custom SEO-friendly URLs** – Created dynamic, user-friendly permalinks for WordPress posts.

✅ **Enhanced User Experience** – Built a Vue.js-powered profile tile system for better navigation and engagement.

✅ **Performance Boost** – Optimized database queries and caching, reducing load times by 50%.

✅ **WooCommerce Customization** – Extended WooCommerce with custom fields, order automation, and payment integrations.

Skills: Amazon Web Services (AWS) · Salesforce.com Development · Klaviyo · Segment (CDP) · Laravel · VueJs · ReactJs · TypeScript · MySQL · Git

---

Department of Labor and Employment RO VIII   **Tacloban City, Leyte, Philippines**
Web Developer (Full Time)   **March 2021 - December 2021**

Key Responsibilities:
- Designed and developed a **Document Tracking System (DTS)** using **Laravel, Vue.js and TypeScript** to streamline document processing.
- Built **role-based access controls** to ensure secure handling of sensitive government documents.
- Designed and optimized **MySQL databases** for efficient storage and retrieval of document records.
- Implemented **real-time tracking features**, allowing users to monitor document progress across departments.
- Developed a **custom dashboard and reporting system**, improving transparency and efficiency in document processing.
- Deployed and configured the system on the agency's **dedicated server**, ensuring reliability and security.
- Integrated **audit logs and notifications**, enhancing accountability and workflow automation.
- Ensured **system security and compliance** with government IT policies.

Key Achievements:

✅ **Developed a Document Tracking System** – Reduced document processing time and improved transparency.

✅ **Optimized Database Performance** – Designed efficient MySQL queries, enabling fast document retrieval.

✅ **Secured System Deployment** – Set up and maintained an in-house server for hosting the DTS.

✅ **Enhanced Workflow Efficiency** – Automated document movement tracking, reducing manual follow-ups.

✅ **Improved User Accessibility** – Developed a user-friendly interface for employees across different departments.

Skills: PHP · Laravel · Vue.js · TypeScript · MySQL

FREELANCE & INDEPENDENT PROJECTS

AVM International Online (MLM System) (October 2025)
- Tech Stack: Laravel, Vue.js, MySQL, Tailwind Css, JavaScript, jQuery
- ☑ Built a MLM System for complicated binary computations and transactions.
- ☑ Integrated payment modes, sales analytics and reporting tools.
- ☑ Implemented a complicated database structure that is fast and organized.

Product 8 Online Point of Sales System (February 2022)
- Tech Stack: Laravel, Vue.js, MySQL, Bulma, JavaScript, jQuery
- ☑ Built a cloud-based POS system for real-time transaction processing.
- ☑ Integrated sales analytics and reporting tools.
- ☑ Ensured high performance with database query optimizations.

DOLE RO VIII Systems (June 2021)
- Tech Stack: Laravel, Vue.js, MySQL, Bulma, JavaScript, jQuery
- ☑ Developed a document tracking system to streamline government document management.
- ☑ Automated workflow processes to enhance efficiency and reduce manual workload.
- ☑ Implemented a secure and scalable architecture to ensure data integrity and accessibility.

SeaDream Seafood Restaurant Management System (June 2019)
- Tech Stack: Laravel, Vue.js, MySQL, Bulma, JavaScript, jQuery
- ☑ Developed a restaurant management system for order and inventory tracking.
- ☑ Implemented real-time order management for efficiency.

Helper Choice (Find Helper) Website (January 2018)
- Tech Stack: Laravel, Vue.js, MySQL, Bootstrap 4.0, JavaScript, jQuery
- ☑ Created a platform to connect users with domestic helpers.
- ☑ Integrated real-time search and filtering functionality.

MaxRevOne Online Review System (June 2017)
- Tech Stack: PHP, MySQL, Bootstrap 4.0, JavaScript
- ☑ Designed and developed an online review system to help students prepare for exams.
- ☑ Implemented user authentication and progress tracking features.
